

Building a Sustainable Culture: Strategies to Foster Sustainability and Ethics

🕒 10:00 AM - 10:50 AM 📅 21 May 2025

📍 Djanet Hall, CIC Algeria

Background:

This session is part of ICD’s broader Sustainability and ESG Awareness Program, which supports the integration of sustainable practices across operations. It explores how fostering a culture of sustainability and ethics can drive long-term value, institutional resilience, and strategic transformation.

Aligning with the Annual Meetings theme, “Diversifying Economies and Enriching Lives,” the session emphasizes how ethical leadership, inclusive governance, and cross-sector collaboration can empower organizations to become agents of positive change. Beyond environmental concerns, sustainability here is framed as a driver of innovation, stakeholder trust, and operational excellence.

Key Objectives:

- Strengthen awareness of ESG principles and their relevance to institutional strategies.
- Illustrate alignment between ESG integration and Islamic finance values.
- Present pathways to embed sustainability into governance and decision-making.
- Address institutional and cross-sector challenges to sustainable practice adoption.
- Promote leadership and accountability in driving sustainability.
- Encourage collaboration between public, private, and development stakeholders.
